

## 10 kW Hybrid Inverter for PV Systems

**Model: DEYE HYBRID INVERTER 10KW**

### Short Description

The three-phase 10 kW hybrid inverters from Deye are designed for modern photovoltaic systems. They enable a combination of solar power generation, battery storage, and backup power supply - suitable for both residential and commercial applications.

Thanks to 100% unbalanced output capability, the device is especially suited for applications with uneven phase distribution. The integration of an energy management system, backup power function, and the ability to connect up to 10 units in parallel make this inverter highly versatile.

### Typical Applications

- Single-family homes with PV systems
- Commercial facilities with battery storage
- Systems with high self-consumption
- PV systems with diesel generator support
- Backup-capable photovoltaic solutions

### System Advantages

- Three-phase hybrid inverter with 10 kW power
- 100% unbalanced output performance
- Parallel connection of up to 10 units
- 150 A charge/discharge current, 48 V battery compatibility
- Integrated energy management function
- Compatible with diesel generators
- 6 configurable charge/discharge time periods
